

WGBCC Interagency Situation Report

Preparedness Level 5

as of 8/14/00 at 2400 hrs.

Current Situation: Initial attack activity decreased; 3 new fires were reported for 0 acres burned. Containment targets were met on the Rabbit, Choke Cherry, and Right Hand fires. The South Willow fire continued to burn actively, with a 2,400 acre increase in size. Steady progress was reported on the other large fires. Combined acreage gains on the existing large fires equaled a total of 2,620 additional acres burned.

Outlook: An upper level ridge will keep warmer temperatures and very dry, stable conditions over most of the area for the next few days. Increasing monsoonal moisture over south-central and east-central Nevada will bring isolated, mainly dry thunderstorms on Tuesday and Wednesday. In the extended forecast, a low pressure trough is expected to bring cooler and breezy (but continued dry) conditions to the area at the end of the week.
